Quality-focused seafood sourcing

A partner approach to product requirements, quality coordination, and export documentation for international seafood buyers.

OUR APPROACH Clear specifications	**OUR PEOPLE** Trained QC professionals
OUR FOCUS Quality-minded coordination	**OUR GOAL** Long-term buyer confidence

TRUSTED SEAFOOD PARTNER FROM VIETNAM

Our Quality Commitment

At Vinasea, quality begins with understanding the buyer's requirements. Our website describes a customer-representation service in Vietnam that helps buyers select suppliers and coordinate supervision of product quality, quantity, and delivery timing. Vinasea also describes a QC team with seafood-related university backgrounds and training in HACCP, quality management, and import-export operations.

A practical, buyer-oriented approach

01 Requirements first

Clarify product species, form, size or grade, processing, packaging, labeling, and destination-market needs before an order is confirmed.

02 Supplier & order coordination

Coordinate with relevant suppliers and follow up on agreed quality, quantity, and shipment schedule requirements.

03 Communication & follow-up

Support clear communication and timely sharing of order information so buyers can address questions or discrepancies efficiently.

Quality coordination through the order

01	**Define requirements** Confirm product specifications, packaging, labeling, quantities, delivery terms, and any buyer inspection needs.
02	**Align with suppliers** Discuss feasible sourcing options and ensure the agreed requirements are understood by the parties involved.
03	**Coordinate quality checks** Agree the scope, timing, responsible party, and reporting format for any checks or inspections required for the order.
04	**Review documents** Confirm the documents needed for the specific product, supplier, destination market, and shipment.
05	**Follow up** Communicate production and shipment progress and escalate discrepancies for resolution.

Certifications & Compliance

Food-safety and export requirements vary by product, processing site, supplier, and destination market. For this reason, the applicable certificates and supporting records should be checked against the specific product and shipment rather than assumed to apply universally.

Documentation buyers may request

Supplier / processing-site certificates	Copies of relevant, current certificates issued to the actual supplier or processing establishment, including scope and validity dates.
Product specifications	Agreed product description, species, processing style, size or grade, glazing or net weight details where applicable, packaging, and storage conditions.
Inspection & quality records	Inspection reports, test results, or quality records when applicable and available for the specific order.
Export & shipment documents	The documents required for the product and destination, confirmed with the buyer, supplier, and relevant authorities.
Traceability information	Lot or batch identifiers and supporting traceability records where applicable to the product and supply chain.

Important note on certificates

This brochure describes Vinasea's quality-coordination approach; it does not represent that Vinasea itself holds any specific third-party certification. Any certificate, audit report, approval, or claim such as HACCP, BRCGS, FDA registration, ISO, or other scheme should only be presented as applicable after verifying the current document, legal entity or facility name, scope, and expiry or status.

For buyer due diligence, please request the current supporting documents relevant to your product and shipment.

Work With Vinasea

Whether you are sourcing seafood from Vietnam for Japan, the European Union, or another market, Vinasea welcomes discussions about your product requirements, supplier qualification needs, quality coordination, and export documentation.

To help us respond efficiently, please include:

- Product name, species, and processing form
- Target size / grade and packaging requirements
- Estimated quantity and shipment frequency
- Destination country and required documents
- Any inspection, testing, or certification requirements
